AI Talent Recommendation Letter

AITR-0001 - AI Talent Recommendation Letter

To whom it may concern,

It is with great enthusiasm that I recommend Andrija Jovanovic (born 1998-10-20) as an exceptionally talented and driven individual in the field of Data Science and AI Engineering.

During his internship, Andrija developed a forecasting tool to support strategic planning and designed a hedging strategy that contributed to decision-making in financial operations. He worked on a full end-to-end machine learning pipeline project involving advanced statistical calculations, supervised learning, and deep learning models.

His technical stack included Python (with Scikit-Learn), MLflow, Azure DevOps, and Power BI. He also demonstrated strong skills in data wrangling, big data concepts, and business-oriented model evaluation aligning well with modern enterprise Data Science requirements.

He is currently completing dual specializations at 42 Vienna:

- RNCP 6 - Web & Mobile Development (BSc equivalent)

- RNCP 7 - Database Architecture & Data (MSc equivalent)

Additionally, he is enrolled at Gabor Denes University, pursuing a BSc in Computer Science Engineering.

Andrija is not only a quick learner but also a problem-solver who takes ownership and thrives in fast-paced environments. His integrity, adaptability, and focus on long-term impact make him a rare talent worth investing in.

AI Talent Recommendation Letter

I strongly recommend Andrija for any opportunity in Data, AI, or Software Engineering, and I am confident he will exceed expectations.

Sincerely,

AITR (AI Talent Recommender)
